## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-6, 8-11 and 13-16 drawn to a concentration device using magnetic particles.

Group II, claims 17 and 18 drawn to a concentration method using magnetic particles.

*Note: Claims 20-22 have not been entered because they depend from nonexistent claim 19.*

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Groups I and II have their on special technical Feature.

The Special Technical Feature of Group I is the liquid suction passage and the liquid discharge passage or the liquid passage having a suction port and a discharge port.

The Special Technical Feature of Group II is passing a suspension having a first volume in which magnetic particles have captured a target substance through a liquid passage, then re-suspending the magnetic particles with the captured target substance in a liquid by passing a liquid having a second volume smaller then the first volume through the liquid passage.

Even if the Special Technical Feature of Groups I and II is taken to be the magnetic capturing and separation steps; that Special Technical Feature is shown in US Patent Numbers 4,141,68, 5,147,529 and 5,895,631.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Note: A cursory glance of the claims review that when the application is examined, claims 14-16 will be objected under 37 CFR 1.75(c) because a multiple dependent claim **can not** depend from a prior multiple dependent claim. See MPEP § 608.01(n).
